- (2) The results of a preliminary chemical breath analysis are admissible in a prosecution for a violation of Section 819 for one or more of the following purposes:
 - (a) To assist the Tribal Court in determining a challenge to the validity of an arrest. This subparagraph does not limit the introduction of other competent evidence offered to establish the validity of an arrest.
 - (b) As evidence of the defendant's breath alcohol content, if offered by the defendant.
 - (c) As evidence of the defendant's breath alcohol content, if offered by the prosecution to rebut testimony or other evidence, including but not limited to testimony elicited on cross-examination of a prosecution witness, that is offered or elicited to prove that the defendant's breath alcohol content was lower at the time of the charged offense than when a chemical test was administered pursuant to Subsection C herein.
- (3) A person who refuses to submit to a preliminary chemical breath analysis upon a lawful request by an officer is responsible for a civil infraction.

 - (e) Refusing an officer's request to take a test described in Subparagraph (a) will result in either the suspension of his or her operator's or chauffeur's license and vehicle group designation or operating privilege or entry of a Court Order prohibiting the operation of a motor vehicle within the Bay Mills Indian Community.
- (3) A sample or specimen of urine or breath shall be taken and collected in a reasonable manner. Only a licensed physician, or an individual operating under the delegation of a licensed physician who is qualified to withdraw blood and acting in a medical environment, may withdraw blood at an officer's request to determine the amount of alcohol or presence of a controlled substance or both in the person's blood, as provided in this Subsection.
- (4) A chemical test described in this Subsection shall be administered at the request of an officer having reasonable grounds to believe the person has violated Section 819. A person who takes a chemical test administered at an officer's request as provided in this Section shall be given a reasonable opportunity to have a person of his or her own choosing administer one of the chemical tests described in this Subsection within a reasonable time after his

or her detention. The test results are admissible in Court and shall be considered with other competent evidence in determining the defendant's innocence, guilt or responsibility. If the person charged is administered a chemical test by a person of his or her own choosing, the person charged is responsible for obtaining the chemical analysis of the test sample.

- (5) If, after an accident, the driver of a vehicle involved in an accident is transported to a medical facility and a sample of the driver's blood is withdrawn at the time for medical treatment, the results of a chemical analysis of that sample are admissible in any civil or criminal proceeding to show the amount of alcohol or presence of a controlled substance or both in the person's blood at the time of the accident, regardless of whether the person had been offered or refused a chemical test. The medical facility or person performing the chemical analysis shall disclose the results of the analysis to a tribal or other applicable prosecuting attorney who requests the results for use in a prosecution. A medical facility or person disclosing information in compliance with this Subsection is not civilly or criminally liable for making the disclosure.
- (6) If, after an accident, the driver of a vehicle involved in the accident is deceased, a sample of the decedent's blood shall be withdrawn in a matter directed by the medical examiner to determine the amount of alcohol or the presence of a controlled substance, or both, in the decedent's blood at the time of the accident. The medical examiner shall give the results of the chemical analysis of the sample to the law enforcement agency investigating the accident and that agency shall forward the results to any other applicable law enforcement agency.
- (7) In administering chemical tests for the purposes of this Section, a tribal officer shall comply with any uniform rules that are promulgated by the Michigan Department of State Police; similarly, an instrument for preliminary chemical breath analysis may be used for a chemical test described in this Subsection if approved pursuant to rules promulgated by the Michigan Department of State Police.

- D. Evidence – The provisions of Subsection C relating to chemical testing do not limit the introduction of any other competent evidence bearing upon the question of whether a person was impaired by, or under the influence, of intoxicating liquor or a controlled substance, or a combination of intoxicating liquor and a controlled substance, or whether the person had an alcohol content of 0.10 grams or more per 100 milliliters of blood, per 210 liters of breath, or per 67 milliliters of urine, or if the person is less

The prosecution shall furnish the results at least ten (10) days before the day of the trial. The prosecution shall offer the test results as evidence in that trial. Failure to fully comply with the request bars the admission of the results into evidence by the prosecution.

F. Presumptions – Except in a prosecution relating solely to a violation of Section 819 (A)(1)(b) and (D), the amount of alcohol in the driver’s blood, breath, or urine at the time alleged as shown by chemical analysis of the person’s blood, breath, or urine gives rise to the following presumptions:

- (1) If there were at the time 0.06 grams or less of alcohol per 100 milliliters of the defendant’s blood, per 210 liters of the defendant’s breath, or per 67 milliliters of the defendant’s urine, it is presumed that the defendant’s ability to operate a motor vehicle was not impaired due to the consumption of intoxicating liquor, and that the defendant was not under the influence of intoxicating liquor.
- (2) If there were at the time more than 0.06 grams but less than 0.10 grams of alcohol per 100 milliliters of the defendant’s blood, per 210 liters of the defendant’s breath, or per 67 milliliters of the defendant’s urine, it is presumed that the defendant’s ability to operate a vehicle was impaired within the provision of Section 819 (C) due to the consumption of intoxicating liquor.
- (3) If there were at the time 0.10 grams or more of alcohol per 100 milliliters of the defendant’s blood, per 210 liters of defendant’s breath, or per 67 milliliters of the defendant’s urine, it is presumed that the defendant was under the influence of intoxicating liquor.

- G. Admissibility of evidence – A person’s refusal to submit to a chemical test as provided in Subsection C is admissible in a prosecution described in Section 819 (C)(1) only to show that a test was offered to the defendant, but not as evidence in determining the defendant’s innocence, guilt or responsibility. In a jury trial, the jury shall be instructed accordingly.
- H. Refusal to submit to chemical test – If a person refuses the request of an officer to submit to a chemical test offered pursuant to Subsection C above, a test shall not be given without a Court Order, but the officer may seek to obtain the Court Order.
